

Privacy statement Egodact software

October 26, 2019, Roermond, the Netherlands

What data is stored?

- **User data**
 - Your name
 - Your e-mail address
 - The profile picture of your Google or Microsoft account
 - The groups that you've been assigned to or manage—this is set by your school
- **Your portfolio**

This includes everything that you enter in Egodact software; for example, challenges or progress within rubrics.
- **Your progress (portfolio history)**

We copy (snapshot) your portfolio weekly so that we can show your progress over time.

Where is my data used?

- The “Welcome, <First name>” message
- The search function in the coach mode
- The “I’m working together with” field in shared challenges
- The user manager for admins
- The portfolio page (your homepage) and the coach mode

Who can see my data?

- Your **user data** is visible to **all users** so that they can share challenges with you.
- Your **portfolio and progress** are visible to **yourself and coaches**. Do note that shared challenges are also visible to everyone that's participating in that challenge.
- **Egodact** can also access your data in order to develop and improve our software. We also occasionally verify the number of users.
- Your data is also shared with **Google Ireland Ltd.** to store it and to authenticate users. Read the “Firebase” section for more information.

How can I delete or modify my data?

- Deletion: if you want your data to be deleted, you'll have to contact your school since they're responsible for deleting your data.
- Modification: change the information in your Google or Microsoft account and sign in again. This will automatically update your personal data in our software.
- Shared challenges: these will continue to exist until everyone leaves them. Your name does disappear when your school deletes your data.

Sub-processing: Firebase

Egodact software uses the Firebase Real-Time Database to store your data. We also use Firebase's User Authentication service.

Our usage of Firebase services causes a delay of (at most) 180 days in the actual deletion of data. Do note that we cannot access deleted data during these 180 days; this period is imposed on us by Firebase itself.

Firebase also stores your IP address and user-agent (technical information about your computer/browser). These are used by the user authentication service for extra security and by the Firebase profiler tool to measure the performance of the database.

[View this page for more information about Firebase and privacy.](#)

[View this page for more information about the Firebase profiler tool.](#)

[View this page for more information about your user-agent.](#)

Firebase is part of Google (Google Ireland Ltd.).

How is my feedback handled?

When you give us feedback, your feedback is sent to our feedback server. This server then forwards your feedback to feedback@egodact.com through a simple e-mail. Feedback is anonymous, unless you choose to attach your e-mail address to it.

Usage of cookies and local storage

We use cookies and local storage to:

- Cache images to make them load faster.
- Store your language preference.
- Remember which rows you've collapsed.
- Keep you signed in.

Questions or suggestions regarding privacy

We try to be as transparent as possible about which data we store, where we store it and who can see it. If you have a question or suggestion, we'd love to hear from you!

[Send an e-mail \(privacy@egodact.com\)](mailto:privacy@egodact.com)

This privacy statement could be changed in the future.
